

**Government of the Republic of Trinidad and Tobago**  
Ministry of Rural Development and Local Government

## **MEDIA INVITATION**

**Re: Quality Assurance in Infrastructure Projects - Feature Address by Senator the Honourable Franklin Khan, Minister of Rural Development and Local Government.**

***Kent House, Maraval: August 5<sup>th</sup> 2016.***

As part of CARIRI's ongoing efforts to build capacity and enhance industrial capability and competitiveness in the Construction Sector, the Institute will be hosting a training session entitled '**Quality Assurance in Infrastructure Projects**' specifically geared towards the 14 Regional Corporations.

Achieving quality standards is one of the most important issues to consider when thinking about infrastructure projects and the management of quality is an important factor in determining the competitive edge of any business or organisation.

It is critical that organisations recognize and understand the importance of a proper quality system since it begins with selection, sampling and storage of materials. CARIRI is an important institutional partner in this regard and it is timely that they have taken this initiative to address the areas of deficiency in quality.

Senator the Honourable Franklin Khan, Minister of Rural Development and Local Government, will deliver the feature address at the training session hosted by CARIRI. You are cordially invited to attend and provide media coverage in the interest of the public.

**Date: Tuesday 9<sup>th</sup> August 2016**

**Time: 9:00am – 11:40am**

**Venue: CARIRI's Centre for Enterprise Development (CED), Innovation Avenue, Freeport.**
